

4-7 Appendix 1 End-of-Period Spreadsheet

Accountants often use spreadsheets for analyzing and summarizing data. Such spreadsheets are not a formal part of the accounting records. This is in contrast to the chart of accounts, the journal, and the ledger, which are essential parts of an accounting system. Spreadsheets are usually prepared by using a computer program such as Microsoft's Excel.[®]

Objective 8 - Describe and illustrate the end-of-period spreadsheet.

As illustrated earlier in this chapter, an end-of-period spreadsheet is used to summarize adjusting entries and their effects on the accounts. As illustrated in the chapter, the financial statements for **NetSolutions** can be prepared directly from the spreadsheet's Adjusted Trial Balance columns shown in [Exhibit 1](#).

Some accountants prefer to expand the end-of-period spreadsheet shown in [Exhibit 1](#) to include financial statement columns. [Exhibits 21, 22, 23, 24, and 25](#) illustrate the step-by-step process of how to prepare this spreadsheet. As a basis for illustration, NetSolutions is used.
