

4-5j Step 10. Preparing a Post-Closing Trial Balance

A post-closing trial balance is prepared after the closing entries have been posted. The purpose of the post-closing trial balance is to verify that the ledger is in balance at the beginning of the next period. The accounts and amounts in the post-closing trial balance should agree exactly with the accounts and amounts listed on the balance sheet at the end of the period.

The post-closing trial balance for Kelly Consulting is shown in [Exhibit 17](#). The balances shown in the post-closing trial balance are taken from the ending balances in the ledger shown in [Exhibit 18](#). These balances agree with the amounts shown on Kelly Consulting’s balance sheet in [Exhibit 15](#).

Exhibit 17

Post-Closing Trial Balance, Kelly Consulting

Kelly Consulting Post-Closing Trial Balance April 30, 20Y8			
	Account No.	Debit Balances	Credit Balances

Using Data Analytics**Loading Data**

When a company uses data analytics to solve a problem, it must not only extract and transform data but also load the data into the software program that will be used for analysis. There are a variety of software programs that can be used for data

analytics. For example, Excel™, Tableau™, and Alteryx™ can all be used to perform data analytics. Starting in the Take It Further section of [Chapter 5](#), we include data analytic cases using Excel throughout this text.

The data analytic process of loading data is in some ways similar to the preparation of the adjusted trial balance, which was illustrated in [Chapter 3](#) and in [Exhibit 14](#). Once the adjusted trial balance is prepared (loaded), it becomes the basis for preparing financial statements as illustrated in [Exhibit 15](#).

Chapter 4: The Accounting Cycle: 4-5j Step 10. Preparing a Post-Closing Trial Balance
